

Sewing curved seams

Sewing curved seams can be challenging but there are so many fun quilts to make with circles. In the morning we will explore methods for making blocks with inset quarter circles, inset half circles, and orange peel blocks. In the afternoon we will make bias strip quarter circles and bias strip circles as well as inset whole circles.

The quilt pictured above was made by members of the Tucson Modern Quilt Guild following a demonstration of some of these techniques. Members took home precut block kits and brought back the completed blocks. This quilt was donated to a local children's charity.

For this class the instructor will provide precut block kits for each technique and work through the steps in class.

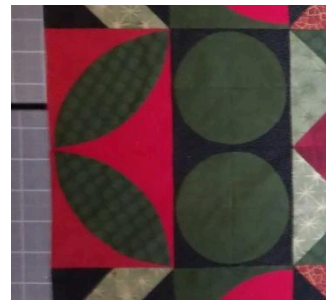

Feel free to bring any curved seam projects you have in progress.
